

STONE POLYMER COMPOSITE FLOORING

SPHC Flooring (Stone Polymer Hybrid Core) is an upgrade and improvement of regular luxury vinyl tiles (LVT), the main content of SPHC is natural limestone powder, polyvinyl chloride and stabilizer which combined by a certain ratio provides us with a very stable composite material.

SPHC Flooring is considered the new generation of floor covering, it features:

Very stable, high performance, completely 100% water-proof, High Density Solid Core, indentation resistant. It can be installed directly onto any substrate, either concrete, ceramic or existing particle board flooring. It is formaldehyde free, and a completely safe floor covering material for both residential and commercial environments. It is also very heavy, which adds to its stability.

There are many variations in quality and design of SPHC but Trade Flooring only imports Commercial grade SPHC Flooring so that we can offer a 30 year residential and 10 year commercial warranty.

SPHC Flooring is specially designed with click together locking system to create an extremely tight fit so, it can be easily installed on different floor substrates.

SPEED OF INSTALLATION

Under normal circumstances it is about 30% faster than traditional Glue Down Planking.

WATERPROOF

Our SPHC Flooring is 100% waterproof, so it can be installed in wet areas, kitchens & bathrooms.

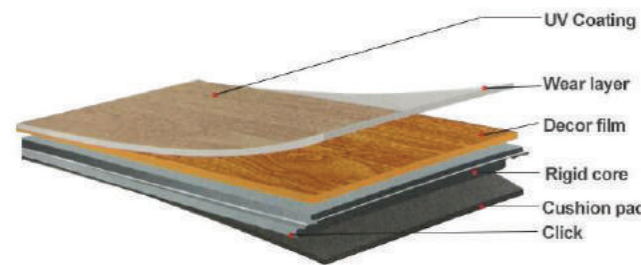

STRONG STABILITY

Much better than traditional vinyl flooring.

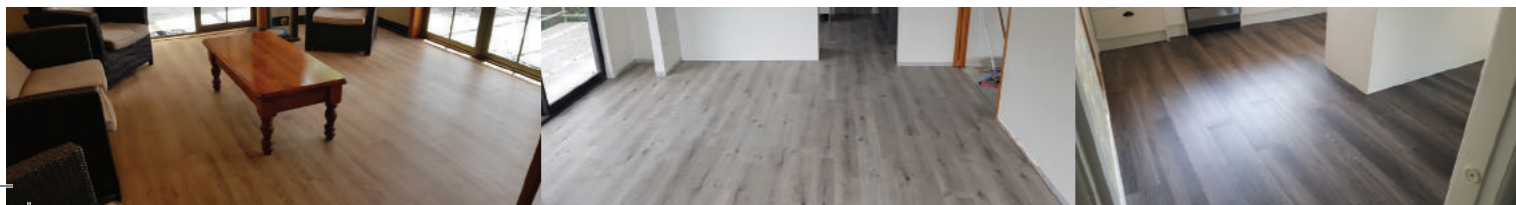

SPHC Specifications

Underlay (Underlayments)

Trade Flooring Ltd imports a range of specially engineered underlays to suit a variety of specific uses such as for sound studios, carpets, engineered floors, under-floor heating compatible, extra thick soundproofing underlays, and for our fabulous Bamboo flooring products.

Underlay is critical to Bamboo flooring and is an arena of expertise on its own. It affects how your floor feels underfoot, whether it stays dry, offers good support, maintains cold resistance, and other factors.

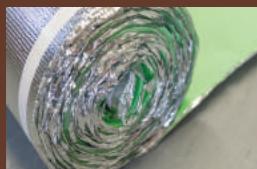

EVA40-LG

Top of the range Underlay 4mm EVA Rubber with closed cell moisture block technology and outstanding noise control at 86db

EVA30-8

Standard Underlay included with all installation packages

IXPE30-L

A 3mm IXPE Foam with moisture block technology and a good all round noise reduction of 73db

Resilient Bamboo Floors and Cladding

Bamboo flooring is highly attractive and comes in a range of colour choices. It's particularly suitable for new home builds, retrofits, interior cladding, and commercial buildings. It also has many desirable advantages:

- **Stiletto-proof**
